Experience

Trinet Internet Solutions

June 2023 - December 2023

Web Developer Intern

Irvine, CA

During my web developer internship, I acquired proficiency in HTML, CSS, JavaScript, PHP, Drupal 7, Google Analytics, and WordPress, while also managing multiple e-commerce sites.

Dev Studio Pro

January 2024 - Current

Web Developer

Fullerton, CA

At the web dev company, I helped build several websites, getting better at HTML, CSS, JavaScript, PHP, Drupal 7, Google Analytics, and WordPress along the way.

Beverly Hills Marketing

April 2023 - June 2023

Web Developer Intern

Los Angeles, CA

During my internship, I constructed the marketing website using WordPress and Squarespace, expanding my proficiency in these platforms and gaining hands-on experience in website development and design.

Theta Tau Professional Engineering Fraternity

December 2021 - December 2023

Webmaster/Webmaster Shadow

Fullerton, CA

During my time as a webmaster and webmaster shadow for the professional engineering fraternity, I acquired proficiency in HTML and CSS, and gained hands-on experience hosting websites on GitHub, contributing to the fraternity's online presence and digital outreach efforts.

Code Ninjas

January 2024 - Current

Coding Sensei

Yorba Linda, CA

At Code Ninjas, I inspire kids to code by providing engaging lessons and fostering a love for technology. As a top instructor, I am dedicated to guiding each child's journey in programming and preparing them for success in the digital age.

World Market

August 2021 - Current

Sales Associate

Brea, CA

As a top-performing sales associate at World Market, I excel in providing exceptional customer service and driving sales. With a track record of consistently achieving rewards, I am committed to delivering an outstanding shopping experience for customers while contributing to the success of the team.

Projects

Parking Buddy

Web Developer

Our project simplifies parking with a real-time database tracking available spots and enabling users to pay parking fees conveniently. Built with React, it enhances efficiency and convenience in parking management.

Workout

App Developer

Our collaborative project, a Swift app, assists users in tracking workouts and recommends exercises tailored to specific body areas. Designed to optimize fitness routines, it provides personalized workout recommendations, enhancing users' overall exercise experience.
